

LCloud is a forward-thinking technology consulting firm dedicated to helping clients unlock their business potential by leveraging Cloud solutions and AI. Our team assesses and evaluates client systems, collaborating to design and implement solutions that empower clients to capitalize on the latest technological advancements.

We are looking for an experienced AI Solutions Consultant to join our team. The ideal candidate will be an expert operating at the intersection of business and technology, capable of analyzing client needs and translating them into concrete AI solutions. This person will be responsible for gathering requirements from clients, designing concepts for AI/ML solutions, and presenting ready solutions implemented by our team of engineers.

AI Solutions Consultant

Key responsibilities:

- Collaborate with clients to understand their business needs and gather requirements;
- Design AI/ML solution concepts tailored to specific client requirements;
- Work closely with the engineering team implementing the designed solutions;
- Prepare and present solution proposals and ready implementations to clients;
- Recommend appropriate LLM models and technical approaches (RAG, fine-tuning) for specific business cases;
- Design concepts for document processing and analysis systems using cutting-edge AI techniques;
- Create concepts for multilingual AI solutions with particular focus on European languages;
- Consult on technical aspects of implementations regarding cost efficiency and performance;
- Track the latest trends in AI/ML technologies and cloud solutions.

Qualifications:

- Experience in designing AI/ML solutions for real business problems;
- Ability to communicate technically with clients – translating complex technical concepts into business language;
- Documented experience with at least two of the following AI areas:
 - RAG Systems (Retrieval-Augmented Generation) for business and technical document analysis,
 - Generative AI - systems for generating images, content, or code,

- Multilingual AI systems for customer-facing applications (especially European languages),
- Code Analysis AI - automation of source code analysis and review,
- Technical Document Processing - analysis of specialized technical documents, drawings, plans;
- General knowledge of AI services across various cloud platforms (AWS, GCP, Azure);
- Proficiency in LLM model fine-tuning and prompt engineering;
- Experience with using LLM models as SaaS services (Claude, GPT-4, Gemini);
- Knowledge of vector databases (OpenSearch, Pinecone, Chroma) and embedding techniques;
- Solid understanding of techniques and workflows related to document processing;
- Basic programming knowledge (Python preferred).

Preferred Skills:

AI/ML Models:

- Large language models as services: Claude, GPT-4, Gemini, OpenAI;
- Knowledge of open-source models: LLaMA, Mistral, CodeLlama;
- Generative models: Stable Diffusion XL, Flux, DALL-E;
- Multimodal models capable of processing text, images, and code.

AI Solutions:

- RAG Systems - designing Retrieval-Augmented Generation systems;
- Fine-tuning and model adaptation for specific use cases and industries;
- Advanced Prompt Engineering - optimizing LLM interactions for various tasks;
- Document Intelligence - analysis of PDF documents, technical drawings (DWG, KMZ);
- Code Analysis AI - automating code review, error detection, and anti-patterns;
- Risk Assessment AI - identifying risks and inconsistencies in documents and projects;
- Multi-format Processing - handling diverse input data formats.

AI Integration Technologies:

- Vector Databases: OpenSearch, Pinecone, Chroma, FAISS;
- Document Processing: PDF parsing, OCR, technical drawing analysis;
- API Integrations: GitLab, JIRA, Excel automation, webhooks;
- Security & Compliance: Working with NDA data, GDPR compliance;
- Multi-language Support: Especially European languages (Polish, English).

Knowledge of AI services in the cloud:

- AWS: Bedrock, SageMaker, Lambda, S3;
- Google Cloud: Vertex AI;

- General knowledge of cloud solution architecture.

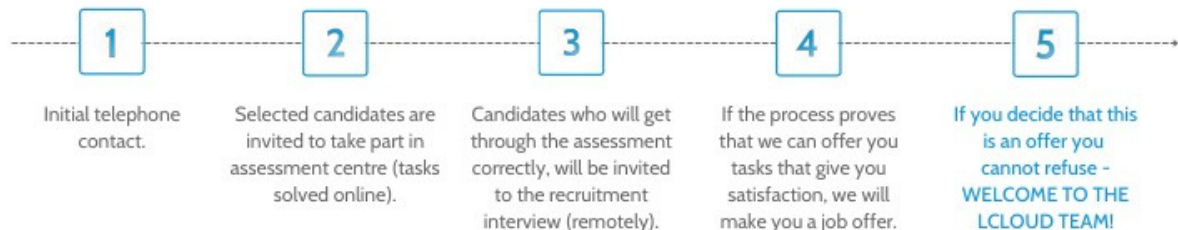

Additional Skills:

- Experience in technology consulting;
- Presentation skills and experience in conducting client workshops;
- Experience with multimodal AI models (processing text, images, and code);
- Knowledge of basic cost optimization issues for AI systems;
- Knowledge of industry-specific AI applications (e-commerce, energy, customer service);
- Understanding of best practices in data privacy and security;
- Experience with agile software development methodologies.

Benefits:

- 100% remote;
- Competitive salary and benefits package;
- Opportunities for career growth and skill development;
- Support for certifications or further education related to cloud technologies;
- Opportunities for career advancement within the rapidly growing environment;
- Collaborative and innovative work environment.

What can you expect in our recruitment process ?
